

# California Fertility Partners

## Out of State/Country

Our practice has helped patients from all over the country and throughout the world achieve their dream of pregnancy. It is not necessary to live in southern California in order to become a patient of our practice. After an initial consultation either in person or via telephone, we will prescribe an individualized treatment plan which can be conducted through the coordinated efforts of a CFP physician and your local gynecologist or fertility specialist. If you do not have a physician, we can help identify a specialist who can perform the initial monitoring ultrasounds and hormone assays prior to your arrival in Los Angeles. In this way patients can decrease the amount of time required to be spent in the Los Angeles area undergoing treatment.

Our new offices are conveniently located approximately 25 minutes from the Los Angeles International Airport. Our staff can help with referrals to a selection of hotels throughout the surrounding area.
